SUMMARY

Fourth-year Software Engineering student at Addis Ababa University with practical training in Full-Stack Development and QA from IBT College Canada. Hands-on experience building responsive React applications with state management (Context API/useReducer), routing, and REST APIs. Seeking a Software Development or QA Engineering internship to contribute clean code and structured testing.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3, SQL, Python

Frontend: React, Next.js, React Router, Context API, useReducer, Responsive Design, Form Validation

Backend & QA: REST APIs, JSON, MySQL, Local Storage, Functional Testing, Debugging, Chrome DevTools

Tools & Networking: Git/GitHub, VS Code, npm, Cisco Packet Tracer, TCP/IP Fundamentals

PROJECTS

[Wasteflow](#) | *React · JavaScript · React Router · Context/state management · Vite · Git/GitHub* 2026

- Built a structured web application for creating, viewing, and managing waste-related reports through reusable React components.
- Implemented report forms with validation, shared report state, report details, and report exploration workflows.
- Tested user flows and production builds while debugging implementation and UI issues.

[Addis Eats](#) | *React · JavaScript · React Router · Context API · useReducer · JSON · Vite* 2026

- Built a multi-route food-ordering application with menu browsing, category filtering, cart management, and checkout workflows.
- Implemented shared application state with Context API and useReducer, including persistent cart data using local storage.
- Added loading, error, accessibility, validation, and administrative functionality while maintaining the project through feature-based Git commits.

[Job Application Tracker](#) | *JavaScript · HTML · CSS · Local Storage* 2026

- Built a browser-based application for recording, organizing, filtering, and tracking job applications.
- Implemented status tracking, dynamic summary statistics, form handling, and application record updates.
- Used local storage to preserve application records between sessions and tested interactive workflows during development.

EDUCATION & TRAINING

BSc, Software Engineering — Addis Ababa University | Fourth Year - Addis Ababa, Ethiopia 2023 – Present

Relevant coursework: Object-Oriented Programming, Database Systems, Web Development, Software Engineering, Computer Networks

Advanced Digital Skills: Full-Stack Software Development & QA Engineering — IBT College Canada 2026 – present

Six-month practical training covering Python, JavaScript, React, Next.js, backend development, REST APIs, software testing, Git/GitHub, and professional development workflows.

CS50P: Programming with Python — Harvard University | Online Coursework 2026 – present

LANGUAGES

English - Professional working proficiency · Amharic - Native
